Aquaponic Gardening: A Step-by-Step Guide to Raising ...

Aquaponics is a revolutionary system for growing plants by fertilizing them with the waste water from fish in a sustainable closed system. A combination of aquaculture and hydroponics, aquaponic gardening is an amazingly productive way to grow organic vegetables, greens, herbs, and fruits, while providing the added benefits of fresh fish as a safe, healthy source of protein.

Aquaponic Gardening: A Step-By-Step Guide to Raising ...

Aquaponics is a hydroponic growing method in that it requires no soil. In both methods, the plants' roots are constantly bathed in highly oxygenated, nutrient-rich water, and both see growth rates far above those found in soil-grown plants. Aquaponics also borrows from many of the classic hydroponic system types.

Aquaponic Gardening: A Step-by-Step Guide to Raising ...

It involves a combination of aquaculture and hydroponics in one integrated system. Once you're set up, there's very little maintenance or effort required. The basic premise of aquaponics is that the waste produced by your fish feeds the plants, and the plants clean the water for the fish, producing one continuous cycle.

How to Grow With Aquaponics in 5 Simple Steps

The key to aquaponics is the natural bacteria found in the growing bed (called the biofilter) . The bacteria eat ammonia and turn it into nitrates, which are great food for plants. Without these nitrifying bacteria, the fish would die in their own waste. Without the nitrates, the plants wouldn't have anything to eat.
