Our critically acclaimed smash hit Cartographies of Time is now available in paperback. In this first comprehensive history of graphic representations of time, authors Daniel Rosenberg and Anthony Grafton have crafted a lively history featuring fanciful characters and unexpected twists and turns. From medieval manuscripts to websites, Cartographies of Time features a wide variety of timelines that in their own unique ways, curving, crossing, branching, defy conventional thinking about the form. A fifty-four-foot-long timeline from 1753 is mounted on a scroll and encased in a protective box. Another timeline uses the different parts of the human body to show the genealogies of Jesus Christ and the rulers of Saxony. Ladders created by missionaries in eighteenth-century Oregon illustrate Bible stories in a vertical format to convert Native Americans. Also included is the April 1912 Marconi North Atlantic Communication chart, which tracked ships, including the Titanic, at points in time rather than by their geographic location, alongside little-known works by famous figures, including a historical chronology by the mapmaker Gerardus Mercator and a chronological board game patented by Mark Twain. Presented in a lavishly illustrated edition, Cartographies of Time is a revelation to anyone interested in the role visual forms have played in our evolving conception of history

Celebrating the colorful legacy of both New Mexico's first 100 years of statehood, this book is a stunning celebration of this Southwestern state's scenic wonders. Remarkable color photographs feature the timeless vistas, majestic landmarks, and cultural icons the Land of Enchantment is known for worldwide—as well as never-before-seen portraits of the state's luminous landscapes and hidden gems. John Annerino casts an artist's, adventurer's, and scholar's perspective on renowned international destinations he knows intimately. He weaves each New Mexico's natural history, legends, and storied human history into evocative introductory essays. Evocative quotes from early travelers, writers, and photographers, whose own journeys defined their character as much as their prose, poetry, and images later defined our modern perceptions of New Mexico's extraordinary Western landscape also shape this tribute to a magnificent place in the American landscape.

This spectacular illustrated history tells the story of the last Romanovs - one of the great tragic love stories of all time - with unparalleled vividness & intimacy. For the plant-obsessed woman of any age, this humorous, illustrated little book celebrates the devotion and quirky habits plants inspire. Plant lady dreams: thrilling the perfect vintage mister. Relatable mantras: Every day is a good day to go plant shopping. All featuring vibrant art by Isabel Serna throughout—plus, a bonus sheet of plant-themed stickers!

The pioneering sociologist and author of The Seven Day Circle continues his analysis of time with this fascinating look at history as social construct. Who were the first people to inhabit North America? Does the West Bank belong to the Arabs or the Jews? Why are racists so obsessed with origins? Is a seventh cousin still a cousin? Why do some societies name their children after dead ancestors? As Eviatar Zerubavel demonstrates in Time Maps, we cannot answer burning questions such as these without a deeper understanding of how we envision the past. In a pioneering attempt to map the structure of collective memory, Zerubavel considers the cognitive patterns we use to organize the past and the social grammar of conflicting interpretations of history. Drawing on fascinating examples that range from Hiroshima to the Holocaust, and from ancient Egypt to the former Yugoslavia, Zerubavel shows how we construct historical origins; how we tie discontinuous events together into stories; how we link families and entire nations through genealogies; and how we separate distinct historical periods from one another through watersheds, such as the invention of fire or the fall of the Berlin Wall. "Time Maps extends beyond all of the old clichés about linear, circular, and spiral patterns of historical process and provides us with models of the actual legends used to map history...brilliant and elegant."-Hayden White, University of California, Santa Cruz

The fantasy world on the other side of the rabbit hole has influenced literary retellings, artwork, music, film, and pushed the boundaries of the magical world by reminding us there is no limit to the madness or the creativity of the creator. HE FINAL WORD. As William Morris said, Have nothing in your houses that you do not know to be useful, or believe to be beautiful.
