Turnaround Management for the Oil, Gas, and Process Industries: A Project Management Approach helps readers understand the phases of development in preparation for a turnaround, with each relevant phase easily identified. Specific to the process industry, especially oil and gas, petrochemical and power plants, this reference simplifies the entire lifecycle of a turnaround and provides specific examples of both successful and unsuccessful turnaround projects. By identifying the most significant performance indicators and strategies to ensure that targets are met, this book will help plant managers keep plants safe, efficient and running successfully. Aligns turnaround project management with ISO guidance and ANSI/PMI standards Utilizes the best tools for long-term planning, including instructional videos and training material Helps users gain practical knowledge through both good and bad turnaround management case studies Presents real-world issues and challenges encountered

This edition of the U.S. Geological Survey (USGS) Minerals Yearbook discusses the performance of the worldwide minerals and materials industries during year 2013 and provides background information to assist in interpreting that performance. These annual reviews are designed to provide timely statistical data on mineral commodities in various countries. This volume covers data from Asia and the Pacific. Each report includes sections on government policies and programs, environmental issues, trade and production data, industry structure and ownership, commodity sector developments, infrastructure, and a summary outlook. Audience: Government employees and contractors, as well as businesses and employees, all working in mineral-related trades, especially with interests in statistics about mineral commodities overseas, will find this resource invaluable.

The Business Year returns, in partnership with Parsons, the UAE Ministry of Economy, and the Abu Dhabi Department of Economic Development (ADDED), to offer insights into the process and progress of Abu Dhabi's journey through COVID-19. This 124-page publication seeks to shed light on the main strategies used by decision makers across Abu Dhabi's key sectors, as well as bring to the fore the experiences that contextualize the Emirate's wider capacity to navigate the pandemic and bounce back stronger.

The United Arab Emirates (UAE) is one of the world's major oil-producing countries. A member of the Organization of the Petroleum Exporting Countries (OPEC) and of the Organization of Arab Petroleum Exporting Countries (OAPEC), the UAE has estimated recoverable oil reserves of around 97 billion barrels, of which the emirate of Abu Dhabi alone accounts for around 92.2 billion barrels. The petroleum experience of Abu Dhabi has been varied and extensive. The structure of the industry has developed from the original concession arrangements through to the establishment of the Abu Dhabi National Oil Company (ADNOC) in 1971 and its subsidiaries. During this transformation of the industry in Abu Dhabi, the legal framework governing the development of petroleum resources in the emirate has evolved, as has the tax system applicable to operating companies, the means of dispute resolution, and the overall organizational structure of the industry. The structure of the Abu Dhabi oil industry is built around the Abu Dhabi National Oil Company (ADNOC), which has rapidly assumed the role of a link between government institutions--which establish petroleum policy--and the operating companies that are responsible for executing approved projects. ADNOC is responsible for the implementation of all aspects of the oil policy of the emirate of Abu Dhabi. As the principal producer of oil and gas in the UAE, ADNOC's position in the industry is central. Atef Suleiman is uniquely qualified to assess the role of ADNOC, and he here examines the nature of its operations, and explores its ability to innovate and develop in order to successfully ride the new trends in the oil industry.

An authoritative and wide-ranging book uncovering the rich heritage of the United Arab Emirates, its political renaissance and its modern transformation into one of the most developed nations in the world.

This book examines China's relations with member states of the Gulf Cooperation Council. It highlights the depth of China's ties with the region bilaterally and multilaterally on a five-dimensional approach: political relations, trade relations, energy security, security cooperation, and cultural relations.
