Major help for African American history term papers has arrived to enrich and stimulate students in challenging and enjoyable ways. Students from high school age to undergraduate will be able to get a jump start on assignments with the hundreds of term paper projects and research information offered here in an easy-to-use format. Users can quickly choose from the 100 important events, spanning from the expansion of the slave trade to North America in 1581 to the devastation of Hurricane Katrina in 2005. Each event entry begins with a brief summary to pique interest and then offers original and thought-provoking term paper ideas in both standard and alternative formats that often incorporate the latest in electronic media, such as iPod and iMovie. The best in primary and secondary sources for further research are then annotated, followed by vetted, stable Web site suggestions and multimedia resources, usually films, for further viewing and listening. Librarians and faculty will want to use this as well. With this book, the research experience is transformed and elevated. Term Paper Resource Guide to African American History is an invaluable source to motivate and educate students who have a wide range of interests and talents. The events chronicle the long struggle for freedom and equal rights for African Americans.

Finalist for the 1991 National Book Award and a New York Times Notable book, *Praying for Sheetrock* is the story of McIntosh County, a small, isolated, and lovely place on the flowery coast of Georgia--and a county where, in the 1970s, the white sheriff still wielded all the power, controlling everything and everybody. Somehow the sweeping changes of the civil rights movement managed to bypass McIntosh entirely. It took one uneducated, unemployed black man, Thurnell Alston, to challenge the sheriff and his courthouse gang--and to change the way of life in this community forever. "An inspiring and absorbing account of the struggle for human dignity and racial equality" (Coretta Scott King)

The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

The first volume to investigate the accountability and relevance of African American political organizations since the end of the modern Civil Rights Movement in 1968

Addressed to the Inhabitants of America, on the Following Interesting Subjects, viz.: I. Of the Origin and Design of Government in General, with Concise Remarks on the English Constitution. II. Of Monarchy and Hereditary Succession. III. Thoughts on the Present State of American Affairs. IV. Of the Present Ability of America, with some Miscellaneous Reflections

Rethinking How to Build Inclusive Organizations Race, Work, and Leadership is a rare and important compilation of essays that examines how race matters in people's experience of work and leadership. What does it mean to be black in corporate America today? How are racial dynamics in organizations changing? How do we build inclusive organizations? Inspired by and developed in conjunction with the research and programming for Harvard Business School's commemoration of the fiftieth anniversary of the founding of the HBS African American Student Union, this groundbreaking book shines new light on these and other timely questions and illuminates the present-day dynamics of race in the workplace. Contributions from top scholars, researchers, and practitioners in leadership, organizational behavior, psychology, sociology, and education test the relevance of long-held assumptions and reconsider the research approaches and interventions needed to understand and advance African Americans in work settings and leadership roles. At a time when--following a peak in 2002--there are fewer African American men and women in corporate leadership roles, Race, Work, and Leadership will stimulate new scholarship and dialogue on the organizational and leadership challenges of African Americans and become the indispensable reference for anyone committed to understanding, studying, and acting on the challenges facing leaders who are building inclusive organizations.

The first full history of Black America's shocking mistreatment as unwilling and unwitting experimental subjects at the hands of the medical establishment. No one concerned with issues of public health and racial justice can afford not to read this masterful book that will stir up both controversy and long-needed debate. From the era of slavery to the present day, starting with the earliest encounters between Black Americans and Western medical researchers and the racist pseudoscience that resulted, *Medical Apartheid* details the ways both slaves and freedmen were used in hospitals for experiments conducted without their knowledge—a tradition that continues today within some black populations. It reveals how Blacks have historically been prey to grave-robbing as well as unauthorized autopsies and dissections. Moving into the twentieth century, it shows how the pseudoscience of eugenics and social Darwinism was used to justify experimental exploitation and shoddy medical treatment of Blacks. Shocking new details about the government's notorious Tuskegee

experiment are revealed, as are similar, less-well-known medical atrocities conducted by the government, the armed forces, prisons, and private institutions. The product of years of prodigious research into medical journals and experimental reports long undisturbed, *Medical Apartheid* reveals the hidden underbelly of scientific research and makes possible, for the first time, an understanding of the roots of the African American health deficit. At last, it provides the fullest possible context for comprehending the behavioral fallout that has caused Black Americans to view researchers—and indeed the whole medical establishment—with such deep distrust.

Although Thomas Jefferson wrote "all men are created equal" in the Declaration of Independence in 1776, women wouldn't be allowed to vote in the United States until many years later. Suffragists, the women who fought for the vote, faced great opposition from several forces, even other groups of women. In 1848, Lucretia Mott, Elizabeth Cady Stanton, and numerous other pioneering suffragists met in Seneca Falls, New York, for the first women's rights convention held in the United States. It wasn't until 1920, however, that all U.S. women gained the right to vote through the 19th Amendment. Readers will learn about the American women's suffrage movement from its earliest years and into the 20th century.

(THE PHILADELPHIA INQUIRER) BOOKS OF THE DECADE • ONE OF ESSENCE'S 50 MOST IMPACTFUL BLACK BOOKS OF THE PAST 50 YEARS • WINNER OF THE CHICAGO TRIBUNE HEARTLAND PRIZE FOR NONFICTION NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • Entertainment Weekly • O: The Oprah Magazine • NPR • Financial Times • New York • Independent (U.K.) • Times (U.K.) • Publishers Weekly • Library Journal • Kirkus Reviews • Booklist • Globe and Mail Her name was Henrietta Lacks, but scientists know her as HeLa. She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “immortal” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb's effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta's family did not learn of her “immortality” until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta's daughter

Read Book African American Paper Topics

Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn't her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences.
