This book presents a coherent, novel vision of Smart Cities, built around a value-driven architecture. It describes the limitations of the contemporary notion of the Smart City and argues that the next developmental step must actively include not only the physical infrastructure, but information technology and human infrastructure as well, requiring the intensive integration of technical solutions from the Internet of Things (IoT) and social computing. The book is divided into five major parts, the first of which provides both a general introduction and a

Access Free Apache Candra Hands On Training Level One

coherent vision that ties together all the components that are required to realize the vision for Smart Cities. Part II then discusses the provisioning and governance of Smart City systems and infrastructures. In turn, Part III addresses the core technologies and technological enablers for managing the social component of the Smart City platform. Both parts combine state-of-the-art research with cutting-edge industrial efforts in the respective fields. Lastly, Part IV details a road map to achieving Cyber-Human Smart Cities. Rounding out the coverage, it discusses the concrete

Access Free Apache Candra Hands On Training Level One

technological advances needed to move beyond contemporary Smart Cities and toward the Smart Cities of the future. Overall, the book provides an essential overview of the latest developments in the areas of IoT and social computing research, and outlines a research roadmap for a closer integration of the two areas in the context of the Smart City. As such, it offers a valuable resource for researchers and graduate students alike.

This two-volume set (CCIS 1075 and CCIS 1076) constitutes the refereed proceedings of the Third International Conference on Advanced

An inspiring and surprising celebration of U.S. women's history told through Smithsonian artifacts illustrating women's participation in science, art, music, sports, fashion, business, religion, entertainment, military, politics, activism, and more. This book offers a unique, panoramic look at women's history in the United States through the lens of ordinary objects from, by, and for extraordinary women. Featuring more than 280 artifacts from 16 Smithsonian museums and archives, and more than 135 essays from 95 Smithsonian authors, this book tells women's history as only the Smithsonian can. Featured

objects range from fine art to computer code, from First Ladies memorabilia to Black Lives Matter placards, and from Hopi pottery to a couch from the Oprah Winfrey show. There are familiar objects--such as the suffrage wagon used to advocate passage of the 19th Amendment and the Pussy Hat from the 2016 Women's March in DC--as well as lesser known pieces revealing untold stories. Portraits, photographs, paintings, political materials, signs, musical instruments, sports equipment, clothes, letters, ads, personal possessions, and other objects reveal the incredible stories of such amazing women as Phillis

Wheatley, Julia Child, Sojourner Truth, Mary Cassatt, Madam C. J. Walker, Amelia Earhart, Eleanor Roosevelt, Mamie Till Mobley, Dolores Clara Fernández Huerta, Phyllis Diller, Celia Cruz, Sandra Day O'Connor, Billie Jean King, Sylvia Rivera, and so many more. Together with illuminating text, these objects elevate the importance of American women in the home, workplace, government, and beyond. Published to commemorate the centennial of the 19th Amendment granting women the right to vote, Smithsonian American Women is a deeply satisfying read and a must-have reflection on how generations of women have defined what it

means to be recognized in both the nation and the world.

Presents a survey of historical and contemporary figures who have rejected traditional gender roles, from peasants who cross-dressed as a protest against taxes, to today's transsexual parents

This book presents the latest research findings, methods and development techniques related to Ubiquitous and Pervasive Computing (UPC) as well as challenges and solutions from both theoretical and practical

Access Free Apache Candra Hands On Training Level One

perspectives with an emphasis on innovative, mobile and internet services. With the proliferation of wireless technologies and electronic devices, there is a rapidly growing interest in Ubiquitous and Pervasive Computing (UPC). UPC makes it possible to create a human-oriented computing environment where computer chips are embedded in everyday objects and interact with physical world. It also allows users to be online even while moving around, providing them with almost permanent access to their preferred services. Along with a great potential to revolutionize our lives, UPC also poses new research
