Every chess player loves to attack the enemy King. Your goal is clear, your thinking is concrete, your creativity is flowing and direct victory is just around the corner. Few things in life are better than successfully conducting a blistering attack on your opponent's King! But how good are you actually at attacking? Have you ever analysed your efforts? Looked at calculation errors, missed opportunities and derailed efforts? After the immense success of his award-winning classic Chess Strategy for Club Players, Herman Grooten has now written an equally accessible follow-up primer on attacking chess. He teaches you how to spot opportunities, exploit weaknesses, bringing your forces to the frontline and striking at the right moment. Grooten concentrates on training the most valuable skills for this process: visualizing, structuring, anticipating, calculating, memorizing and other mental aspects. This is not just another collection of useful thematic moves and motifs but a complete and highly structured course of attacking techniques. And with fantastic new examples, clear explanations and many instructive exercises. Giri won the Dutch Championship four times. Other tournament wins include the Wijk aan Zee B-Group in 2010, a shared first place in Malmö 2011 and a victory in Reggio Emilia 2011/12. In 2014 Giri shared second place in Wijk aan Zee. He won the individual bronze medal for his first-board performance for the Dutch team at the 41st Chess Olympiad in Tromsø in Norway. He finished second at the strong Qatar Masters Open. In 2016 he qualified for the Candidates Tournament in Moscow, where he ended on 50%, with fourteen draws. Giri has an all-round playing style and a strong technique. He likes to fight until the end in seemingly harmless positions, trying to squeeze blood from a stone. But whenever he sees an opportunity, he can be a very sharp tactician as well. Try this training app and play the same winning moves as Anish Giri. This app offers you one hundred training exercises, in positions where Giri turned the game in his favour. The puzzles start at a moderate level and gradually get more difficult. Don't give up!

This new 3rd edition has, besides various corrections and improvements, a new introduction and a brand-new chapter called 'Total Control'. In this 35-page chapter Grooten adds the final instructive brick to his formidable, yet very accessible, building: inspired by Tigran Petrosian's playing style he explains amateurs how to exploit small advantages. With a new set of exercises. ---- Every club player knows the problem: the opening has ended, and now what? First find the right plan, then the good moves will follow! With this book, International Master Herman Grooten presents to amateur players a complete and structured course on: how to recognize key characteristics in all types of positions how to make use of those characteristics to choose the right plan His teachings are based on the famous "Elements" of Wilhelm Steinitz, but Grooten has significantly expanded and updated the work of the first World Champion. He supplies many modern examples, tested in his own practice as a coach of talented youngsters. In Chess Strategy for Club Players you will learn the basic elements of positional understanding: -- pawn structure -- piece placement -- lead in development -- open files -- weaknesses -- space advantage -- king safety -- exploiting small advantages. The author also explains what to do when, in a given position, the basic principles seem to point in different directions. Each chapter of this fundamental primer ends with a set of highly instructive exercises.

Josh Waitzkin combines personal anecdotes with solid instruction in this unique introduction to the game of chess. Concentrating on teaching young or new players how to beef up their attacks, Waitzkin presents 40 different chess challenges. He introduces each problem with a brief description of the game from which it was drawn. 50 line drawings.

A complete course for club and tournament players Chess is 99% tactics. This celebrated observation is not only true for beginners, but also for club players (Elo 1500 - 2000). If you want to win more games, nothing works better than training your combination skills. There are two types of books on tactics: those that introduce the concepts followed by some examples, and workbooks that contain lots of exercises. FIDE Master Frank Erwich has done both: he explains all the key tactical ideas AND provides an enormous amount of exercises for each different theme. Erwich has created a complete tactics book for ambitious club and tournament players. He takes you to the next level of identifying weak spots in the position of your opponent, recognizing patterns of combinations, visualizing tricks and calculating effectively. Erwich has also included a new and important element: tests that will improve your defensive skills. 1001 Chess Exercises for Club Players is not a freewheeling collection of puzzles. It serves as a course text book, because only the most didactically productive exercises are featured. Every chapter starts with easy examples, but don't worry: the level of difficulty will steadily increase.

Join an expert chess player at the table to analyze crucial decisions from major tournaments. Develop a better understanding of the game through a series of themed chapters, each of which examines a particular technique and unravels the thought processes of expert players.

Understand when, where, and how to attack Features numerous practical examples from top-level play In his celebrated Secrets of Chess Defence, Marin examined the task facing the defender. He now turns his prodigious expertise to the other side of the coin. In this wide-ranging treatise, he discusses many topics

including: the balance between attack and defence the premises for initiating an attack advantage in development intuitive sacrifices ...and much more Looks at all aspects of attacking play, from the decision to attack right through to the finish

"The goal of the books in this series Attacking 101 is to provide detailed analysis of my own attack games played against lower rated players. The players are all rated in the range of 1000 to 1800 - the types of players you would frequently encounter at your local chess club, local tournaments, online, and at home. They make the same errors you regularly witness in your games but here you get to see a Chess Master dissect and exploit the moves, show why they are wrong, and how to punish the opponent's poor play." -- back cover.

The old masters of dealt only with the static features of the positional rules of chess. But these are insufficient to explain the basics of chess. The problem is that chess, like in other sciences, has undergone a dynamic revolution, but chess literature doesn't yet reflect it. In this major work Aagaard accessibly explains the rules of attack (the exploitation of a dynamic advantage), balanced between understandable examples, and deep analysis. Five years in the making, this book deals with weak kings, sacrifices, various minor attacking themes, intuitive sacrifices, opposite castling, modern king hunts, and enduring initiative.

U.S. chess champion Larry Christiansen provides the principles of middlegame understanding, tactical alertness and counterattacking skills, enabling club players to get more out of their chess by adopting the sharp, aggressive play of present-day grandmasters. Chess enthusiasts will find incisive methods of play that illustrate attacking motives inherent in the structures of different opening systems and their variations. The Sicilian Defense, the Najdorf, Dragon, Taimanov-Paulsen, Sveshnikov, Rauser, Rossolimo, Closed, and Grand Prix are all handled individually, showing the reader how to recognize and exploit typical tactical opportunities. Even the art of swindling is not neglected, and it's all richly illustrated with examples from practical play, including the games of amateurs. Players of all levels enjoy and benefit from Christiansen's instructive writing and insider information.

50 real life positions explained, by key elements. And the right strategy for winning.
