Slum - Wikipedia

Slums are still predominantly found in urban regions of developing countries but are also still found in developed economies. Slums form and grow in different parts of the world for reasons which vary. The causes for the rapid increase in slum formation and growth consist of. Rapid rural-to-urban migration; Informal economy

Top 10 Largest Slums In The World 2020 – Information population. However, rapid urbanization coupled with relentless growth of slum population created acute disparity withincities and made this supposition a distant dream (Rossi- Espagnet, 1984). Though it is true that the urban population has better availability and

The Challenge of Slums presents the first global assessment of slums, emphasizing their problems and prospects. Using a newly formulated operational definition of slums, it presents estimates of the number of urban slum dwellers and examines the factors at all level, from local to global, that underlie the formation of slums as well as their social, spatial and economic characteristics and dynamics. It goes on to evaluate the principal policy responses to the slum challenge of the last few decades. From this assessment, the immensity of the challenges that slums pose is clear. Almost 1 billion people live in slums, the majority in the developing world where over 40 per cent of the urban population are slum dwellers. The

number is growing and will continue to increase unless there is serious and concerted action by municipal authorities, governments, civil society and the international community. This report points the way forward and identifies the most promising approaches to achieving the United Nations Millennium Declaration targets for improving the lives of slum dwellers by scaling up participatory slum upgrading and poverty reduction programmes. The Global Report on Human Settlements is the most authoritative and up-to-date assessment of conditions and trends in the world's cities. Written in clear language and supported by informative graphics, case studies and extensive statistical data, it will be an essential tool and reference for researchers, academics, planners, public authorities and civil society organizations around the world.

Investigates various aspects of Social Structure and Cultural Practices of Slum-dwellers in Dhaka city. It shows that social structure seems to be influencing the cultural life of slum dwellers.

This report provides an overview of important urban poverty questions. What defines urban poverty and how is urban poverty being measured? What other factors beyond consumption poverty need to be tackled? Who are the urban poor? What relations exist between urban poverty and city size? What linkages exist between urbanization, income, and urban poverty? What policy responses to urban poverty are implemented in selected Asian countries? The report served as a background study for the International Policy Workshop on Urban Poverty and Inclusive Cities in Asia, organized by the Asian Development Bank and the International Poverty Reduction Center held from 24-25 June 2013 in Suqian, Jiangsu Province, the People's Republic of China.

Contents: 1. Introduction, 2. Slums of the World and in India, 3.

Health Care Delivery In India, 4. Slums in Chennai, 5. Health Care Programmes for the Slum Population of Chennai City 6. Children, Women and Geriatric Care for the Slum Population of Chennai City 7. Conclusion and Suggestions. The inspiration to write this book came from the collection of data for a Need Assessment Study of a local slum near my residence. The buildings in the slum locality, the inhabitants and their livelihood, the availability of infrastructure, both governmental and private, in their vicinity and above all, the requirements and expectations of the population, all helped me undertake this study and thus the outcome of the thesis and this book. Specific reference is made to only 4 divisions from 4 zones from the erstwhile Chennai city before the expansion of 2012. Though expansion would have dispersed the ward and division numbers, the name of the location, its locality and the population remain the same. Therefore, I have simply changed the zone numbers to West, North, South-west and South. All the data pertaining to this study limits to the year 2009. Though this parameter is in fact a shortcoming to the study, the hypotheses and its outcome remain significant to this day. Also the representing sample of 300 compared to the total population of 6,26,271 of the 4 zones put together is sufficient since the sample population and the total population are not spread away from each other.

Celebrated urban theorist Davis provides a global overview of the diverse religious, ethnic, and political movements competing for the souls of the new urban poor.

The Human Footprint is a global, thematic, and multi-disciplinary history of the planet, from its earliest origins to its current condition.
