More than one billion people still live below the poverty line – most of them in South Asia and Sub-Saharan Africa. Financial inclusion is a major issue, as more than three-quarters of the numbers of poor and disadvantaged women and men do not have access to financial products and services, such as bank accounts, affordable and suitable loans, and insurance. The key objective of this book is to provide practical case studies of financial inclusion, rather than focus on academic debates such as the ideological basis of promoting microfinance. Using the recently adopted Sustainable Development Goals as an overall framing of the issues, it shows how poor and disadvantaged women and men can be bankable if the right facilitation for maximizing opportunities and addressing constraints are in place. Case studies confirm that achieving inclusive and sustainable access to financial products and services goes beyond simply enabling poor and disadvantaged women and men to have access to credit, or the ability to open a bank account. Examples from Africa, Asia and Latin America demonstrate encouraging progress in making microcredit accessible to millions of poor people. The foremost challenge, however, has been to ensure that they have access to, and usage intensity of, suitable and affordable financial products and services that meet the needs of their livelihoods as well as risks and mitigation strategies. This requires understanding that poor and disadvantaged women and men do not exist in isolation from complex and interdependent functions in the financial system, which includes a number of actors, diversified services, constraints (not just symptoms) and capacities and incentives. Overall, the book provides a rich source of examples of how building inclusive financial systems can empower the world's poor – by increasing income and employment opportunities, securing livelihoods and reducing poverty.

More than one billion people still live below the poverty line – most of them in South Asia and Sub-Saharan Africa. Financial inclusion is a major issue, as more than three-quarters of the numbers of poor and disadvantaged women and men do not have access to financial products and services, such as bank accounts, affordable and suitable loans, and insurance. The key objective of this book is to provide practical case studies of financial inclusion, rather than focus on academic debates such as the ideological basis of promoting microfinance. Overall, the book provides a rich source of examples of how building inclusive financial systems can empower the world's poor – by increasing income and employment opportunities, securing livelihoods and reducing poverty.

In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalfindex.

This book explores the relationships between financial inclusion, poverty and inclusive development from Islamic perspectives. Financial inclusion has become an important global agenda and priority for policymakers and regulators in many Muslim countries for sustainable long-term economic growth. It has also become an integral part of many development institutions and multilateral development banks in efforts to promote inclusive growth. Many studies in economic development and poverty reduction suggest that financial inclusion matters. Financial inclusion, within the broader context of inclusive development, is viewed as an important means to tackle poverty and inequality and to address the sustainable development goals (SDGs). This book contributes to the literature on these topics and will be of interest to researchers and academics interested in Islamic finance and financial inclusion.

Social inclusion is on the agenda of governments, policymakers, and nonstate actors around the world. Underpinning this concern is the realization that despite progress on poverty reduction, some people continue to feel left out. This report aims to unpack the concept of social inclusion and understand better how policies can be designed to further inclusion. First, the report offers a definition of social inclusion as the "process of improving the terms for individuals and groups to take part in society." It unpacks different domains of society that excluded groups and individuals are at particular risk of being left out of -- markets, services, and spaces. Second, the report discusses the most important global mega-trends such as migration, climate change, and aging of societies, which will impact challenges and opportunities for inclusion. Finally, it argues that despite these challenges, change towards inclusion is possible and offers examples of inclusionary policies.

Chapter 68 Women as Victims of Domestic Violence, Chapter 69 Self Help Groups and Empowerment Among the Tribal Women, Chapter 70 Social Exclusion of Girls—Remedial Measures, Chapter 71 Inclusive Education: National and International Scenario, Chapter 72 A Study on Competency Mapping of Women Teachers in Colleges in Madurai City, Chapter 73 “Women Into Educational Leadership and Management: International Differences?”, Chapter 74 Social Exclusion of Women in Poverty: A Situation Analysis, Chapter 75 Premenstrual Syndrome (Pms) Among Hostel Students—A Study in Bharathiar University, Coimbatore, Chapter 76 ‘Untouchability’, the Economic Exclusion of Dalits in India: With Special Reference to Dalit Women, Chapter 77 Oscillation Between Respect and Rejection—A Study Among Urban Elderly, Chapter 78 Gender Based Discrimination: Exclusion of Women in the Indian Labour Market, Chapter 79 Gender Discrimination in Education Among The Fishing Community, Chapter 80 Prevalence of Anemia Among Female Teacher Trainees in the Diet of Chennai District, Chapter 81 Challenges of Women Entrepreneurs in Theni District, Chapter 82 Literacy—A Key to Women’s Empowerment.....

This volume discusses several policy challenges facing countries to achieve and sustain inclusive growth. The volume is based on the proceedings of a conference co-organised by the OECD Economics Department and the World Bank on 24-25 March 2011.

Diverse social programmes—including conditional cash transfer programmes, labour and production inclusion programmes and social pensions—are being implemented in Latin American and Caribbean countries with the aim of ending poverty and reducing inequalities throughout the life cycle. This book offers an up-to-date analysis of these programmes and the way they relate to labour inclusion, and analyses ongoing debates regarding the possible incentives and disincentives they create in terms of the labour supply, formalization and child labour among the target population.

Despite recent advances in important aspects of the lives of girls and women, pervasive challenges remain. These challenges reflect widespread deprivations and constraints and include epidemic levels of gender-based violence and discriminatory laws and norms that prevent women from owning property, being educated, and making meaningful decisions about their own lives--such as whether and when to marry or have children. These often violate their most basic rights and are magnified and multiplied by poverty and lack of education. This groundbreaking book distills vast data and hundreds of studies to shed new light on deprivations and constraints facing the voice and agency of women and girls worldwide, and on the associated costs for individuals, families, communities, and global development. The volume presents major new findings about the patterns of constraints and overlapping deprivations and focuses on several areas key to women's empowerment: freedom from violence, sexual and reproductive health and rights, ownership of land and housing, and voice and collective action. It highlights promising reforms and interventions from around the world and lays out an urgent agenda for governments, civil society, development agencies, and other stakeholders, including a call for greater investment in data and knowledge to benchmark progress.

Poverty and inequality in Latin America are easily recognizable in the faces of women, Afro-descendants, the indigenous, people with disabilities, victims of HIV/AIDS, and other groups outside the societal mainstream. *Social Inclusion and Economic Development in Latin America* reviews the common features of these excluded populations, including their invisibility in official statistics and the stigma, discrimination, and disadvantages they have long endured. But it also examines the region's inclusionary policies and programs that can improve access by these groups to the quality social services and economic and political resources these groups need to level the playing field. Case studies examine ethnic and racial political organization, gender quotas, and labor markets across the region, and social exclusion in Brazil, Honduras, Guatemala, Mexico, and Peru. Comparative studies summarize social inclusion policies of both the European Union and selected countries on the Continent.
