Argues that children's development is influenced primarily by their peers--other children--rather than by their parents

This book analyses the status and prospects of the global governance of Access Benefit Sharing (ABS) in the aftermath of 2010's Nagoya Protocol to the Convention on Biological Diversity (CBD). The CBD's initial 1992 framework of global ABS governance established the objective of sharing the benefits arising from the use of genetic resources fairly between countries and communities. Since then, ABS has been a contested issue in international politics – not least due to the failure of effective implementation of the original CBD framework. The Nagoya Protocol therefore aims to improve and enhance this framework. Compared to the slow rate of progress on climate change, it has been considered a major achievement of global environmental governance, but it has also been coined a 'masterpiece of ambiguity'. This book analyses the role of a variety of actors in the emergence of the Nagoya Protocol and provides an up-to-date assessment of the core features of the architecture of global ABS governance. This book offers a central resource regarding ABS governance for those working on and interested in global environmental governance. This is achieved by focusing on two broad themes of the wider research agenda on global environmental governance, namely architecture and agency. Furthermore, individual chapter contributions relate and link ABS governance to other prominent debates in the field, such as institutional complexes, compliance, market-based approaches, EU leadership, the role of small states, the role of non-state actors and more. Partly due to its seeming technical complexity, ABS governance has so far not been at the centre of attention of scholars and practitioners of global environmental governance. In this book, care is taken to provide an accessible account of key functional features of the governance system which enables non-specialists to gain a grasp on the main issues involved, allowing the issue of ABS governance to move centre-stage and be more fully recognised in discussions on global environmental governance.

English Metres by William Strunk, first published in 1922, is a rare manuscript, the original residing in one of the great libraries of the world. This book is a reproduction of that original, which has been scanned and cleaned by state-of-the-art publishing tools for better readability and enhanced appreciation. Restoration Editors' mission is to bring long out of print manuscripts back to life. Some smudges, annotations or unclear text may still exist, due to permanent damage to the original work. We believe the literary significance of the text justifies offering this reproduction, allowing a new generation to appreciate it.

The Dark Child is a vivid and graceful memoir of Camara Laye's youth in the village of Kouroussa, French Guinea, a place steeped in mystery. Laye marvels over his mother's supernatural powers, his father's distinction as the village goldsmith, and his own passage into manhood, which is marked by animistic beliefs and bloody rituals. Eventually, he must choose between this unique place and the academic success that lures him to distant cities. More than autobiography of one boy, this is the universal story of sacred traditions struggling against the encroachment of a modern world. A passionate and deeply affecting record, The Dark Child is a classic of African literature.
