Think of a map of World War I and chances are that map will be of Europe,but the First World War had just as heavy an impact on the Middle East, shaping the region into what we know it as today. This book gathers together leading scholars in the field to examine this impact, which is crucial to understanding the region's current problems and the rise of groups like the Islamic State. In addition to recounting the crucial international politics that drew fierce lines in the sands of the Middle East,a story of intrigue between the British, Russians, Ottomans, North Africans, Americans, and others;the contributors engage topics ranging from the war's effects on women, the experience of the Kurds, sectarianism, the evolution of Islamism, and the importance of prominent intellectuals like Ziya Gökalp and Michel 'Alfaqi. They examine the dissolution of the Ottoman empire, the exploitation of notions of Islamic unity and pan-Arabism, the influences of Woodrow Wilson and American ideals on Middle East leaders, and likewise the influence of Vladimir Lenin's vision of a communist utopia. Altogether, they tell a story of promises made and promises broken, of the struggle between self-determination and international recognition, of centuries-old empires laying in ruin, and of the political poker of the twentieth century that carved up the region, separating communities into the artificial states we know today.

The armed forces of Europe have undergone a dramatic transformation since the collapse of the Soviet Union. The Handbook of European Defence Policies and Armed Forces provides the first comprehensive analysis of national security and defence policies, strategies, doctrines, capabilities, and military operations, as well as the alliances and partnerships of European armed forces in response to the security challenges Europe has faced since the end of the cold war. A truly cross-European comparison of the evolution of national defence policies and armed forces remains a notable blind spot in the existing literature. The Handbook of European Defence Policies and Armed Forces aims to fill this gap with fifty-one contributions on European defence and international security from around the world. The six parts focus on: country-based assessments of the evolution of the national defence policies of Europe's major, medium, and lesser powers since the end of the cold war; the alliances and security partnerships developed by European states to cooperate in the provision of national security; the security challenges faced by European states and their armed forces, ranging from interstate through intra-state and transnational; the national security strategies and doctrines developed in response to these challenges; the military capabilities, and the underlying defence and technological industrial base, brought to bear to support national strategies and doctrines; and, finally, the national or multilateral military operations by European armed forces. The contributions to The Handbook collectively demonstrate the fruitfulness of giving analytical precedence back to the comparative study of national defence policies and armed forces across Europe.

This volume examines democracy and elections in Africa, taking stock of the state of constitutional democracy on the continent after the democratic gains of the 1990s and 2000s, focusing on how competitive politics or multiparty democracy can be realized and how, through competition, such politics could lead to better policy and practice outcomes.

Since the collapse of the Soviet Union, the Arab world has undergone a series of radical transformations. One of the most significant is the resurgence of activist and puritanical forms of religion presenting as viable alternatives to existing social, cultural and political practices. The rise in sectarianism and violence in the name of religion has left scholars searching for adequate conceptual tools that might generate a clearer insight into these interconnected conflicts. In Striking from the Margins, leading authorities in their field propose new analytical frameworks to facilitate greater understanding of the fragmentation and devolution of the state in the Arab world. Challenging the revival of well-worn theories in cultural and post-colonial studies, they provide novel contributions on issues ranging from military formations, political violence in urban and rural settings, transregional war economies, the crystallisation of sect-based authorities and the restructuring of tribal networks. Placing much-needed emphasis on the re-emergence of religion, this timely and vital volume offers a new, critical approach to the study of the volatile and evolving cultural, social and political landscapes of the Middle East.

Can constitutional amendments be unconstitutional? The problem of 'unconstitutional constitutional amendments' has become one of the most widely debated issues in comparative constitutional theory, constitutional design, and constitutional adjudication. This book describes and analyses the increasing tendency in global constitutionalism to substantively limit formal changes to constitutions. The challenges of constitutional unamendability to constitutional theory become even more complex when constitutional courts enforce such limitations through substantive judicial review of amendments, often resulting in the declaration that these constitutional amendments are 'unconstitutional'. Combining historical comparisons, constitutional theory, and a wide comparative study, Yaniv Roznai sets out to explain what the nature of amendment power is, what its limitations are, and what the role of constitutional courts is and should be when enforcing limitations on constitutional amendments.

Providing an ethnographic account of the Islamic Party of Malaysia (PAS) and its Youth Wing (Dewan Pemuda PAS), this book analyses the genesis and role of Islamic movements in terms of their engagement in mainstream politics. It explores the party's changing approach towards popular culture and critically investigates whether the narrative of a post-Islamist turn can be applied to the PAS Youth. The book shows that in contrast to the assumption that Islamic marketization and post-Islamism are reinforcing each other, the PAS Youth has strategically appropriated and integrated Islamic consumerism to pursue a decidedly Islamist (or 'pop-Islamist') political agenda. The media-savvy PAS Youth elites, which are at the forefront of implementing new outreach strategies for the party, categorically oppose tendencies of political moderation among the senior party. Instead, they are most passionately calling for the establishment of a Syariah-based Islamic order for state and society, although these renewed calls are increasingly expressed through modern channels such as Facebook, YouTube, rock music, celebrity advertising, branded commodities and other market-driven forms of social movement mobilization. A timely and significant contribution to the literature on Islam and politics in Malaysia and beyond, this book sheds new light on widespread assumptions or even hopes of "post-Islamism". It is of interest to students and scholars of Political Religion and Southeast Asian Politics.

Many Americans view Andrew Jackson as a frontiersman who fought duels, killed Indians, and stole another man's wife. Historians have traditionally presented Jackson as a man who struggled to overcome the obstacles of his backwoods upbringing and helped create a more democratic United States. In his compelling new biography of Jackson, Mark R. Cheatham argues for a reassessment of these long-held views, suggesting that in fact "Old Hickory" lived as an elite southern gentleman. Jackson grew up along the border between North Carolina and South Carolina, a district tied to Charleston, where the city's gentry engaged in the transatlantic marketplace. Jackson then moved to North Carolina, where he joined various political and kinship networks that provided him with entrée into society. In fact, Cheatham contends, Jackson had already started to assume the characteristics of a southern gentleman by the time he arrived in Middle Tennessee in 1788. After moving to Nashville, Jackson further ensconced himself in an exclusive social order by marrying the daughter of one of the city's colounders, engaging in land speculation, and leading the state militia. Cheatham notes that through these ventures Jackson grew to own multiple plantations and cultivated them with the labor of almost two hundred slaves. His status also enabled him to build a military career focused on eradicating the nation's enemies, including Indians residing on land desired by white southerners. Jackson's military success eventually propelled him onto the national political stage in the 1820s, where he won two terms as president. Jackson's years as chief executive demonstrated the complexity of the expectations of elite white southern men, as he earned the approval of many white southerners by continuing to pursue Manifest Destiny and opposing the spread of abolitionism, yet earned their ire because of his efforts to fight nullification and the Second Bank of the United States. By emphasizing Jackson's southern identity -- characterized by violence, honor, kinship, slavery, and Manifest Destiny -- Cheatham's narrative offers a bold new perspective on one of the nineteenth century's most renowned and controversial presidents.

hese Proceedings represent the work of contributors to the 13th European Conference on Management Leadership and Governance, ECMLG 2017, hosted this year by the Cass Business School, City, University of London on 11-12 December 2017. The Conference Chair is Dr Martin Rich. The conference will be opened with a keynote address by Dr Helen Rothberg from Marist College, Poughkeepsie, USA with a speech entitled Everything I Know about Leadership I Learned as a Bartender. On the second day the keynote will be delivered by Dr Amanda Goodall from City, University of London on the topic of Why we need core business experts as leaders. ECMLG is a well established platform for individuals to present their research findings, display their work in progress and discuss conceptual advances in many different branches of Management, Leadership and Governance. At the same time it provides an important opportunity for members of the community to come together with peers, share knowledge and exchange ideas. With an initial submission of 160 abstracts, after the double blind, peer review process there are 61 academic papers, 8 PhD Papers and 2 Work in Progress papers in these Conference Proceedings. These papers reflect the truly global nature of research in the area with contributions from, Australia, Austria, Belgium, Brazil, Canada, Czech Republic, Finland, Germany, Hungary, Iran, Ireland, Israel, Kazakhstan, Kenya, Lithuania, Malaysia,

Much of Guyana's 20th century history was defined by the PNC dictatorship and the political and economic wreckage it left behind. In 'Guyana's Great Economic Dowsnwing, 1977 to 1990', Dr Ramesh Gampat presents a comprehensive study of these specific years when the national economy contracted by 2.7 percent annually. He explores the multiple facets of the country's political tribalism which 'does not value freedom, liberty and the flourishing of all people; it values only freedom, liberty and flourishing of tribes.' The study reinforces the widely held belief that until and unless these adversarial groups subsume their respective selfish interests and commit to the common cause of national peace and development, the great dowsnwing might not rest as a historical event but could well re-emerge with further economic devastation if the lessons go unheeded. Dr Gampat makes a strong case for federalism as a solution to Guyana's ethnic politics. Federalism, he posits, would ensure that all Guyanese have equal access to opportunities and resources since a system of provincial governance would be better placed to address discriminatory policies and practices at a localised level. With the country sitting on the cusp of transformative development to be propelled by new-found oil wealth, there is an urgency to settle the divisive politics if every Guyanese is to benefit fairly and equitably from the economic boom. 'Guyana's Great Economic Dowsnwing, 1977 to 1990' offers up a studied and comprehensive analysis that should be part of that bipartisan discourse going forward. --- Ryhaan Shah, Novelist, Social Activist A few piecemeal academic articles analyzing Guyana's economic evolution over the period 1977 to 1990 were written, but they are scattered and lost away in various journals. What was missing is a comprehensive and rigorous exploration of the era of Cooperative Socialism. Dr. Ramesh Gampat's book fills this gap. It is a superb synthesis of historical, theoretical and econometric exploration of the Great Dowsnwing. The book not only provides estimates of important macroeconomic concepts such as Guyana's total factor productivity and long-term growth, but also produces the useful statistics and reviews of poverty, inequality, life expectancy, education outcomes as well as a detailed analysis of the rice sector. As if these are not enough, Gampat sets the tone by situating the exploration in the country's long standing and debilitating ethno-political dynamics. This self-contained book will be of tremendous use to policy makers, journalists and students interested in the historical context of present-day outcomes. I highly recommend this book to public libraries and home reference libraries. ---Tarron Khemraj, William and Marie Selby Professor of Economics and International Studies, New College of Florida

This book covers the study of electromagnetic wave theory and describes how electromagnetic technologies affect our daily lives. From ER to ET: How Electromagnetic Technologies Are Changing Our Lives explores electromagnetic wave theory including its founders, scientific underpinnings, ethical issues, and applications through history. Utilizing a format of short essays, this book explains in a balanced, and direct style how electromagnetic technologies are changing the world we live in and the future they may create for us. Quizzes at the end of each chapter provide the reader with a deeper understanding of the material. This book is a valuable resource for microwave engineers of varying levels of experience, and for instructors to motivate their students and add depth to their assignments. In addition, this book: Presents topics that investigate all aspects of electromagnetic technology throughout history Explores societal and global issues that relate to the field of electrical engineering (emphasized in current ABET accreditation criteria) Includes quizzes relevant to every essay and answers which explain technical perspectives Rajeev Bansal, PhD, is a professor of Electrical and Computer Engineering at the University of Connecticut. He is a member of IEEE and the Connecticut Academy of Science and Engineering. He is a Fellow of the Electromagnetics Academy. His editing credits include Fundamentals of Engineering Electromagnetics and Engineering Electromagnetics: Applications. Dr. Bansal contributes regular columns to IEEE Antennas and Propagation Magazine and IEEE Microwave Magazine.
