WITTENSTEIN Benelux WITTENSTEIN alpha develops and produces drives, controls and positioning devices for sectors that require maximum precision. Our products consistently raise the bar around the world.

Servo actuators - WITTENSTEIN alpha GmbH WITTENSTEIN develops customized products, systems and solutions for highly dynamic motion, precise positioning and smart networking for electromechanical drive technology.

Products - WITTENSTEIN North America Wittenstein & Wittenstein has "of counsel" relationships other prestigious New York City Law Firms to give you the best of both Worlds: close personal local service and the top names in the game.

Wittenstein & Wittenstein, ESQS., P.C. WITTENSTEIN cyber motor Really customized instead of customized We develop drives that are optimally tailored to your specific needs.

WITTENSTEIN cyber motor GmbH WITTENSTEIN UK Ltd are a company that were formed in 1999 as the UK subsidiary to WITTENSTEIN SE. WITTENSTEIN SE employ 2,500 people worldwide in 60+ different locations, always there when you need them to cover all available options, making business as easy as possible.

Wittenstein | Our Suppliers | Routeco Wittenstein Gearheads (Formally Alpha Gearheads) As distributors for Wittenstein, we are able to supply Wittenstein gearboxes. Contact our sales team on 01376 333333 or sales@micromech.co.uk for price and delivery or technical assistance.

As a new generation of activists demands an end to racism, A Place to Land reflects on Martin Luther King, Jr.'s "I Have a Dream" speech and the movement that it galvanized. Winner of the Orbis Pictus Award for Outstanding Nonfiction for Children Selected for the Texas Bluebonnet Master List Much has been written about Martin Luther King, Jr. and the 1963 March on Washington. But there's little on his legendary speech and how he came to write it. Martin Luther King, Jr. was once asked if the hardest part of preaching was knowing where to begin. No, he said. The hardest part is knowing where to end. "It's terrible to be circling up there without a place to land." Finding this place to land was what Martin Luther King, Jr. struggled with, alongside advisors and fellow speech writers, in the Willard Hotel the night before the March on Washington, where he gave his historic "I Have a Dream" speech. But those famous words were never intended to be heard on that day, not even written down for that day, not even once. Barry Wittenstein teams up with legendary illustrator Jerry Pinkney to tell the story of how, against all odds, Martin found his place to land. An ALA Notable Children’s Book A Capitol Choices Noteworthy Title Nominated for an NAACP Image Award A Bank Street Best Book of the Year A Notable Social Studies Trade Book for Young People A Booklist Editors’ Choice Named a Best Book of the Year by Publishers Weekly, Kirkus Reviews, and School Library Journal Selected for the CBC Champions of Change Showcase

Like White Rose History Volume I (Regular Edition, ISBN 0-9710541-4-2), this book tells the complete story of how the students who came to be known as the White Rose decided to resist Hitler and the crimes of the Nazi Party. Unlike most extant literature, does not focus solely on Hans and Sophie Scholl, but widens the scope to include ALL who sacrificed their lives for this cause. Differs from regular edition because of footnotes and additional information not suitable for younger readers (the target age of the regular edition). Read Along or Enhanced eBook: In 1959 the Boston Red Sox was the last team in the Major Leagues to integrate. But when they call Elijah “Pumpsie” Green up from the minors, Bernard is overjoyed to see a black player on his beloved home team. And, when Pumpsie’s first home game is scheduled, Bernard and his family head to Fenway Park. Bernard is proud of Pumpsie and hopeful that this historic event is the start of great change in America. This fictionalized account captures the true story of baseball player Pumpsie Green’s rise to the major leagues. The story is a snapshot of the Civil Rights Movement and a great discussion starter about the state of race relations in the United States today. From the Hardcover edition.

In modern times, the recruitment of children into a political organization and ideology reached its boldest embodiment in the Hitler Youth, founded in 1933 soon after the Nazi Party assumed power in Germany. Determining that by age ten children’s minds could be turned from play to politics, the regime inducted nearly all German juveniles between the ages of ten and eighteen into its state-run organization. The result was a potent tool for bending young minds and hearts to the will of Adolf Hitler. Baldur von Schirach headed a strict chain of command whose goal was to shift the adolescents’ sense of obedience from home and school to the racially defined Volk and the Third Reich. Luring boys and girls into Hitler Youth ranks by offering them status, uniforms, and weekend hikes, the Nazis turned campgrounds into preilitary training sites, air guns into machine guns, sing-alongs into marching drills, instruction into indoctrination, and children into Nazis. A few resisted for personal or political reasons, but the overwhelming majority enlisted. Drawing on original reports, letters, diaries, and memoirs, Michael H. Kater traces the history of the Hitler Youth, examining the means, degree, and impact of conversion, and the subsequent fate of young recruits. Millions of Hitler Youth joined the armed forces; thousands gleefully participated in the subjugation of foreign peoples and the obliteration of “racial aliens.” Although young, they committed crimes against humanity for which they cannot escape judgment. Their story stands as a harsh reminder of the moral bankruptcy of regimes that make children complicit in crimes of the state.

The present book highlights studies that show how smart cities promote urban economic development. The book surveys the state of the art of Smart City Economic Development through a literature survey. The book uses 13 in depth city research case studies in 10 countries such as the North America, Europe, Africa and Asia to explain how a smart economy changes the urban spatial system and vice versa. This book focuses on exploratory city studies in different countries, which investigate how urban spatial systems adapt to the specific needs of smart urban economy. The theory of smart city economic development is not yet entirely understood and applied in metropolitan regional plans. Smart urban economies are largely the result of the influence of ICT applications on all aspects of urban economy, which in turn changes the land-use system. It points out that the dynamics of smart city GDP creation takes ‘different paths,’ which need further empirical study, hypothesis testing and mathematical modelling. Although there are hypotheses on how smart cities generate wealth and social benefits for nations, there are no significant empirical studies available on how they generate urban economic development through urban spatial adaptation. This book with 13 cities research studies is one attempt to fill in the gap in knowledge base.

Did you know Band-Aids were invented by accident?! And that they weren't mass-produced until the Boy Scouts gave their seal of approval? 1920s cotton buyer Earle Dickson worked for Johnson & Johnson and had a klutzy wife who often cut herself. The son of a doctor, Earle set out to create an easier way for her to bandage her injuries. Band-Aids were born, but Earle's bosses at the pharmaceutical giant weren't convinced, and it wasn't until the Boy Scouts of America tested Earle's prototype that this ubiquitous household staple was made available to the public. Soon Band-Aids were selling like hotcakes, and the rest is boo-boo history. "Appealingly designed and illustrated, an engaging, fun story" — Kirkus Reviews STARRED REVIEW
