Up for auction is a RCBS Cast Bullet Manual Number 1. This book is in great condition. There are no tears, rips, missing pages or writing on any of the pages. The pages of the book are starting to yellow slightly due to their age. This book would make an excellent addition to any collection. This is an estate sale find and is being sold as is.

"Over half a century has passed since I cut my teeth on an old .36 Navy Colt. For 40 years I have almost never been out of easy reach of a good sixgun. Thirty years I spent in the saddle, packing, punching cows and breaking saddle brones. The sixgun was worn just as regularly as my pants and many times was much more important to my existence. It pulled me out of several tight scrapes with wild horses, wilder cattle and some big game. Though I have witnessed several gun fights, have had guns pulled on me and have been shot at several times, I have never had to use my gun on a man. Several times it was touch-and-go and perhaps only the current knowledge that I was both fast and accurate with a sixgun saved me from being embroiled. Though I do not recommend a sixgun for big game, thirty head of big game have fallen to mine, including elk, bear, deer, cougar, mountain goat and javelina. I have also trailed up a great many big game animals of various species that were wounded by sportsmen and then I finished them off. No record was kept of these or the many coyotes, bobcats and lesser game, or the livestock I have had to kill." This classic includes the following chapters: Introduction I. History of the Sixgun II. Selecting the Handgun III. Learning To Shoot IV. Sixgun Sights V. Long Range Shooting VI. Game Shooting VII. Double Action Shooting VIII. Gun Rigs and Holsters IX. Quick Draw and Hip Shooting X. Gun Fighting XI. Revolver Versus Auto Pistol XII. Aerial and Trick Shooting XIII. Slip Shooting, Fanning, Cavalry Guns XIV. Loading and Management of Cap and Ball Sixguns XV. Repairs, Remodeling, Resighting XVI. A Bullet Chapter XVII. Cartridge Reloading XVIII. Selection of Cartridges XIX. Ornamentation, Barrel Lengths, Balance, Velocities XX. Care and Cleaning Supplement

Indispensable information has been funnelled into a huge new edition, completely rewritten and refreshed by Sam Fadala. This textbook for black powder shooters is topped off by a catalog of all currently-manufactured work powder firearms. The ultimate source for black powder.

Finding the right cast bullet to perform in your black powder cartridge rifle can be a pursuit of disappointment or reward. Matthews puts into perspective the tools and techniques used to make your cast bullet shooting a success.

Metallic Cartridge Handloading covers all aspects of the reloading process: cartridge case; maintaining, improving and loading the case; seating and reading of primers; loading of propellant; bullets and loading of bullets; accurate load development; internal & external ballistics; bullet making & casting; and handloading press. This is not a reloading manual containing specific recipes for various loads; it is a how-to book that covers the entire detailed process of cartridge reloading.

The reasons for handloading ammunition may be summed up as (a) permitting one to obtain the greatest possible accuracy from his rifle, pistol or revolver and (b) providing one with an abundance of ammunition at small expense. If you have a firearm that you do not shoot as much as you would like to because of the expense, it will pay you to reload your fired cartridge cases. Any person can, with a few simple tools and the instructions contained within this book learn how to handload.

This publication is an informative guide book on reloading to include equipment and accessories used as tools of the trade. It also includes my extensive experiences as a reloader of approximately three hundred thousand rounds during the past thirty-five years. The book covers fourteen chapters with a major emphasis on Dillon reloading equipment and its many accessories. It does include discussions on other products from major manufacturers. Other chapters mention such subjects as reloading dies, primers, new pistol powders, reloading the 9mm, plated/coated/moly bullets, special topics, FAQs, and the Ruger American Pistol reviews with my experience loading for this firearm. This book is not an A to Z manual on how to begin reloading. It is a highly referenced publication that is written for all working reloaders who want to learn more usable info and wish to develop a lifelong hobby practical volume reloading.
