Risk society is the manner in which modern society organizes in response to risk. The term is closely associated with several key writers on modernity, in particular Ulrich Beck and Anthony Giddens. The term was coined in the 1980s and its popularity during the 1990s was both as a consequence of its links to trends in thinking about wider modernity, and also to its links to popular discourse, in particular the growing environmental concerns during the period.

This panoramic analysis of the condition of Western societies has been hailed as a classic. This first English edition has taken its place as a core text of contemporary sociology alongside earlier typifications of society as postindustrial and current debates about the social dimensions of the postmodern. Underpinning the analysis is the notion of the 'risk society'. The changing nature of society's relation to production and distribution is related to the environmental impact as a totalizing, globalizing economy based on scientific and technical knowledge becomes more central to social organization and social conflict.

Twenty years ago Ulrich Beck published Risk Society, a book that called our attention to the dangers of environmental catastrophes and changed the way we think about contemporary societies. During the last two decades, the dangers highlighted by Beck have taken on new forms and assumed ever greater significance. Terrorism has shifted to a global arena, financial crises have produced worldwide consequences that are difficult to control and politicians have been forced to accept that climate change is not idle speculation. In short, we have come to see that today we live in a world at risk. A new feature of our world risk society is that risk is produced for political gain. This political use of risk means that fear creeps into modern life. A need for security encroaches on our liberty and our view of equality. However, Beck is anything but an alarmist and believes that the anticipation of catastrophe can fundamentally change global politics. We have the opportunity today to reconfigure power in terms of what Beck calls a 'cosmopolitan material politics'. World at Risk is a timely and far-reaching analysis of the structural dynamics of the modern world, the global nature of risk and the future of global politics by one of the most original and exciting social thinkers writing today.

This text explores the way we perceive risk and integrate change into our lives - insisting that these are the essential forces driving policy development today.

social theory in making sense of environmental issues. The book provides insights into the complex dynamics of change in 'risk societies'.

Few would dispute that we are living at a time of high anxiety and uncertainty in which many of us will experience a crisis of identity at some point or another. At the same time, news media provide us with a daily catalogue of disasters from around the globe to remind us that we inhabit a world of crisis, insecurity and hazard. *Anxiety in a Risk Society* : looks at the problem of contemporary anxiety from a sociological perspective highlights its significance for the ways we make sense of risk and uncertainty argues that the relationship between anxiety and risk hinges on the nature of anxiety. Iain Wilkinson believes that there is much for sociologists to learn from those who have made the condition of anxiety the focus of their life's work. By making anxiety the focus of sociological inquiry, a critical vantage point can be gained from which to attempt an answer to the question: Are we more anxious because we are more risk conscious? This is an original and thought-provoking contribution to the understanding of late modernity as a risk society.

More than 30 years have passed since Ulrich Beck published *Risk Society: Towards a New Modernity*. Beck's work had a transformative effect on social theory, yet its impact on law and legal scholarship remains largely unexplored. This collection of essays, collected shortly after Beck's death in 2015, explores and reconsiders the legal foundations, concepts and methodologies of the "modern project" in light of risk society theory. In this volume, academics and lawyers from around the world engage in one of the first comprehensive interrogations of the impact of risk society theory on law and legal scholarship. The authors critically examine topics such as: law and (ir)responsibility, reflexive modernisation, and liability, responsibility and accountability through the prism of risk society theory. This collection aims to explore the capacity of law and legal processes to meet the challenges of modernity and adapt to unfamiliar and changing social paradigms. This collection will interest socio-legal scholars, practitioners, and students confronted with the novel dilemmas of contemporary society. Religion posits one characteristic as an absolute: faith. Compared to faith, all other social distinctions and sources of conflict are insignificant. The New Testament says: 'We are all equal in the sight of God'. To be sure, this equality applies only to those who acknowledge God's existence. What this means is that alongside the abolition of class and nation within the community of believers, religion introduces a new fundamental distinction into the world the distinction between the right kind of believers and the wrong kind. Thus overtly or tacitly, religion brings with it the demonization of believers in other faiths. The central question that will decide the continued existence of humanity is this: How can we conceive of a type of inter-religious tolerance in which loving one's neighbor does not imply war to the death, a type of tolerance whose goal is not truth but peace? Is what we are experiencing at present a regression of monotheistic religion to a polytheism of the religious spirit under the heading of 'a God of one's own'? In Western societies, where the autonomy of the individual has been internalized, individual human beings tend to feel increasingly at liberty to tell themselves little faith stories that fit their own lives to appoint 'Gods of their own'. However, this God of their own is no longer the one and only God who presides over salvation by seizing control of history and empowering his followers to be intolerant and use naked force.
