'two cultures': the apparently unbridgeable chasm of understanding and knowledge between modern literature and modern science. In recent decades, scholars have worked diligently and often with great ingenuity to interrogate claims like Snow's that represent twentieth- and twenty-first-century literature and science as radically alienated from each other. The Cambridge Companion to Literature and Science offers a roadmap to developments that have contributed to the demonstration and emergence of reciprocal connections between the two domains of inquiry. Weaving together theory and empiricism, individual chapters explore major figures - Shakespeare, Bacon, Emerson, Darwin, Henry James, William James, Whitehead, Einstein, Empson, and McClintock; major genres and modes of writing - fiction, science fiction, non-fiction prose, poetry, and dramatic works; and major theories and

Some of the most innovative and spell-binding literature has been written for young people, but only recently has academic study embraced its range and complexity. This Companion offers a state-of-the-subject survey of English-language children's literature from the seventeenth century to the present. With discussions ranging from eighteenth-century moral tales to modern fantasies by J. K. Rowling and Philip Pullman, the Companion illuminates acknowledged classics and many more neglected works. Its unique structure means that equal consideration can be given to both texts and contexts. Some chapters analyse key themes and major genres, including humour, poetry, school stories, and picture books. Others explore the sociological dimensions of children's literature and the impact of publishing practices. Written by leading scholars from

This 2004 volume offers an introduction to British literature that challenges the traditional divide between eighteenth-century and Romantic studies. Contributors explore the development of literary genres and modes through a period of rapid change. They show how literature was shaped by historical factors including the development of the book trade, the rise of literary criticism and the expansion of commercial society and empire. The first part of the volume focuses on broad themes including taste and aesthetics, national identity and empire, and key cultural trends such as

sensibility and the gothic. The second part pays close attention to the work of individual writers including Sterne, Blake, Barbauld and Austen, and to the role of literary schools such as the Lake and Cockney schools. The wide scope of the collection, juxtaposing canonical authors with those now gaining new attention from scholars, makes it essential reading for students of eighteenth-century literature and Romanticism.

Featuring essays written by an international team of experts, this Companion maps the dynamic literary landscape of the American South.
