The Oxford Handbook of the French Revolution brings together a sweeping range of expert and innovative contributions to offer engaging and thought-provoking insights into the history and historiography of this epochal event. Each chapter presents the foremost summations of academic thinking on key topics, along with stimulating and provocative interpretations and suggestions for future research directions. Placing core dimensions of the history of the French Revolution in their transnational and global contexts, the contributors demonstrate that revolutionary times demand close analysis of sometimes tiny groups of key political actors - whether the king and his ministers or the besieged leaders of the Jacobin

republic - and attention to the deeply local politics of both rural and urban populations. Identities of class, gender and ethnicity are interrogated, but so too are conceptions and practices linked to citizenship, community, order, security, and freedom: each in their way just as central to revolutionary experiences, and equally amenable to critical analysis and reflection. This volume covers the structural and political contexts that build up to give new views on the classic question of the 'origins of revolution'; the different dimensions of personal and social experience that illuminate the political moment of 1789 itself; the goals and dilemmas of the period of constitutional monarchy; the processes of destabilisation and ongoing conflict that ended that experiment; the key issues surrounding the emergence and experience of 'terror'; and the short- and long-term legacies, for both good and ill, of the

revolutionary trauma - for France, and for global politics.

This volume aims to provide a variety of points of entry to the history of France between 900 and 1200. It covers key themes such as France's political culture and identity, rural economy and society, the Church and intellectual history.

The kingdom of France, a byword for upheaval and instability for a century before 1660, was transformed over the subsequent generation into the greatest power in Europe and an institutional model admired and imitated almost everywhere. A further century elapsed before this hegemony was challenged, and even then the collapse of monarchy in 1788 took most people by surprise. This book, bringing together an authoritative international panel of

historians, portrays and analyses the life of France between two revolutions, a time later known as the old regime. All aspects of French life are covered: the economy, social development, religion and culture, French activity overseas, and not least politics and public life, where our understanding has been completely renewed over recent years. A detailed chronology and full bibliography complete this compelling analysis of an age behind whose calm and assured facade forces were developing which were to shape a very different country and continent.

This volume brings together an international team of experts who have synthesized and summarized the most recent research on French history of the sixteenth and early seventeenth centuries. Using a topical approach to provide broad thematic coverage of the

period from 1500 to 1660, each chapter focuses on a specific area of French history: politics and the state, the economy, society and culture, religion, gender and the family, and France's burgeoning overseas empire, which was constructed in this period. The book is more than a collection of topical essays, however, as each chapter is linked to the others, together forming a coherent narrative of French history from the advent of the Reformation, through the civil wars of the second half of the sixteenth century, to the Fronde. The result is the most up-to-date synthesis of this period, showing how recent scholarship has significantly revised the traditional narrative of French history.

This collection of French short stories in translation expands our idea of French writing by including new stories by women writers

and by authors of Francophone origin. Spanning the centuries from the late eighteenth to the late twentieth, the collection opens with a rumbustious tale from the Marquis de Sade, takes in the masters of the nineteenth century, from Stendhal and Balzac to Maupassant, and reaches to Quebec, Africa, and the French Caribbean in the twentieth century. Women writers include relatively well known figures such as Renee Vivien, Colette, and Beauvoir, and newer writers such as Assia Djebar, Christiane Baroche, and Annie Saumont. The French short story is a rich and diverse medium, but all the stories selected share a common characteristic: they make exciting reading.

First published in 1980, this book rapidly established itself as the indispensable guide to what brought about the French Revolution,

and to the debates of historians about the issue. It combined a full critical account of recent controversies with a fresh interpretation taking stock of where the debate had led. Since 1980 discussion among historians has continued as lively as ever, and has moved in directions scarcely explored at that time. The 'revisionist' criticism which destroyed the classic mid-century consensus emphasizing the Revolution's social and economic origins has opened the way to a 'post-revisionist' approach focused on cultural change. This new edition brings the subject up to date with an extensively rewritten survey of the historiography up to the present day, and a revised interpretation modified in the light of research by a new generation of scholars. It will thus remain the starting point for any serious study of the greatest of all revolutions, which lies at the root of the modern political world. 'important book . . . readable and

Chronicling one of the most popular national cinemas, this book traces the evolution of French filmmaking from 1895 - the year of the debut of the Cinematographe in Paris - to the present day. Williams offers a synthesis of history, biography, aesthetics and film theory.
