The Starving Artist's Lampwork Project Book includes 18 illustrated step-by-step lampworked glass projects for the beginning to intermediate lampworker. Starting with a brief tutorial of basic lampworking methods, the techniques and projects included here were originally created for use in rehabilitation centers for soldiers returning from overseas after World War II. Also known as scientific glassblowing, lampwork is a method of manipulating glass rods and tubes in a gas torch flame to construct a variety of practical and artistic items. No furnace is required, and the necessary tools and materials can be readily obtained at reasonable cost.

Lampwork-the art of crafting glass beads and jewelry-is surprisingly easy and increasingly popular. Joan Gordon, former editor of Making Jewellery magazine, has gathered 14 of the world's top glassmakers to teach you the techniques, from safety and materials to bead shapes and adornment. With their expert advice, you'll quickly master the skills needed to create 26 stunning projects.

Building on Volumes I and II of this series, this information-packed book will deepen and broaden every artist's exploration of the highly addictive craft of lampworked glass. Printed entirely in full colour, Volume III features over 1300 photographs and diagrams, including detailed step-by-step demonstrations by 35 different artists, with dozens of finished works to inspire the advanced and beginning lampworker alike. The fascinating human enterprise of creativity is emphasized throughout this engaging and readable text, in historical references and the author's personal travel accounts around the globe.

This is a new book designed as a "how to" manual for the beginner. The material (glass) is introduced first with its history, composition & sources. All the equipment & tools, required to work glass, are described in detail. The fundamental procedures are defined & clearly illustrated with ample practice exercises. The instruction of these procedures is reinforced with a ten lesson course arranged in progression. The experienced glassblower may want to use this format to train apprentices. There are step by step procedures for making over 65 different items. Preliminary techniques for making larger sculptures are described & profiles of some well known glass sculptors with examples of their work. Another example of the diversity of glassblowing is demonstrated in the story of Gerhard Finkenbeiner & his innovative developments to the Glass Harmonica. The section on blown glass tubing describes how the fundamental procedures areoften working with tubing. The instructions include a number of blown items including several Christmas ornaments. There are directions to show fifteen ways to decorate glass surfaces including glue chipping & the chemical silvering of glass. Where & how to market your glass items is also revealed. There is a complete directory of where to obtain equipment & supplies.

This comprehensive guide to working with wire features the work of four artists, providing a great range of projects and ideas. This book begins with general wire basics, with technique-specific basics introducing each chapter. Unlike other wire books on the market, this book includes fresh, new looks in chapters on woven wire, textured wire, corrugated wire, heavy wire, and chain & wire. This book also introduces strip wire, creating innovative projects that appeal to all different types of artists.

From the Back Cover: Studio time is expensive. Unfortunately, most glassblowing students still learn through a combination of apprenticeship and observation-a slow and inefficient method. The Art of Fire teaches you quickly how to manipulate the glass through a series of structured lessons and exercises, including: Safety exercises to prevent burns; Over 500 photographs and illustrations; Step-by-step instruction for all basic techniques; Fixes for more than 50 common problems.

Now a Netflix film starring and directed by Chiwetel Ejiofor, this is a gripping memoir of survival and perseverance about the heroic young inventor who brought electricity to his Malawian village. When a terrible drought struck William Kamkwamba's tiny village in Malawi, his family lost all of the season's crops, leaving them with nothing to eat and nothing to sell. William began to explore science books in his village library, looking for a solution. There, he came up with the idea that would change his family's life forever: he could build a windmill. Made out of scrap metal and old bicycle parts, William's windmill brought electricity to his home and helped his family pump the water they needed to farm the land. Retold for a younger audience, this exciting memoir shows how, even in a desperate situation, one boy's brilliant idea can light up the world. Complete with photographs, illustrations, and an epilogue that will bring readers up to date on William's story, this is the perfect edition to read and share with the whole family.
