Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

A man with humble beginnings on the family farm, minimal formal education and no qualifications, but an enormous drive and vision. Along with a very smart, loyal and patient wife! He founded one of the most successful automotive small businesses in Australia, was the initiator of trends, creator some of the most radical, yet immaculately engineered cars this country (and all others) have seen and inspired thousands to modify their own cars. Often found observing and listening to reactions from a distance with what many misconstrue as a grumpy, dour look on his face, he prefers to let his cars do the talking, and boy do they do get people talking! Following is the story of a name well recognised in the Australian automotive landscape, but a person who very few actually really know.
