For me, covered call writing is used to enhance the income from that holding or a means of selling for a slightly higher price than the market is offering. I use put writing for two different...

### Adding Income Using Cash-Covered Puts And Covered Calls ...

If you already own a stock (or an ETF), you can sell covered calls on it to boost your income and total returns. Income from covered call premiums can be 2-3x as high as dividends from that stock, and then you also get to keep receiving dividends and some capital appreciation as well.

### Covered Calls: A Step-by-Step Guide with Examples

Covered call writing on the other hand, is when you sell a call against a long stock you already own, allowing you to earn premium income in exchange for temporarily forfeiting much of the stock's upside potential. It means you are willing to sell your long stock at the call's strike price when "called upon" by an exercise notice.

### Cash-Secured Puts Vs. Covered Calls - Option Party

Owning the stock you are writing an option on is called writing a covered call. If you don't own the stock or underlying security, it is called writing a naked call. A naked call strategy is inherently risky, as there is limited upside potential and a nearly unlimited downside potential should the trade go against you.

### 5 Mistakes to Avoid When Selling Covered Calls - Snider ...

For a covered call, it involves selling one call option for each 100 shares of stock that the trader is long. They can either enter the position simultaneously or they can own the stock and sell covered calls against the position. For cash-secured puts, it is a synthetic long position.
