Ford Mondeo Engine Problems

While the engine limp-home mode is usually associated with a problem under the bonnet, the ESP light is more likely to be triggered by a problem with the braking or throttle-by-wire system. Certainly, the latter could also trigger a limp-home response from the engine. Have the car scanned by a workshop and see what fault codes pop their heads up.

Ford Mondeo Engine Problems | CarsGuide

Listen for a rattle in the engine of the Ford Mondeo. This is one of the tell-tale signs that there are problems with the dual mass flywheel, which is more likely to occur if the car has been driven at high speeds or completed in excess of 120,000 miles. This is an expensive part to replace, requiring the services of an expert mechanic.

Ford Mondeo Common Problems - BreakerLink Blog

Ford Mondeo: Engine Cranks → Won't Start There are a lot of issues that can cause your Mondeo to crank, but not start. The engine needs air, fuel, and a spark in order to run. It is highly likely that if the engine is cranking, but not starting that it has thrown an OBDII code.
