How to Adjust a Front Derailleur - YouTube

Shimano Side-Swing front derailleur 6. MTB vs road FD. Shimano road and MTB FDs have different cable pull ratio - that is the amount of FD movement for each mm of cable movement. This means that MTB FDs might not work well with indexed road shifters and vice versa.

Compatibility [05] Front derailleurs | BikeGremlin

Shimano's "10-speed" triple front derailleurs are optimized for a 13 tooth difference, typically 52-39. Most other Shimano front triple derailleurs are optimized for a 10 tooth difference between middle and large ring. Surprisingly, the size of the "granny" chainring has little effect on derailleur performance. Many cyclists customize their "road ...

All About Front Derailers - Sheldon Brown

A short history of the front derailleur. Early users of double chainsets didn't even bother with front derailleurs; they pushed the chain from the large to small chainring with their heels at the bottom
