Beginners Guide To Hydroponic Gardening - A&P Nursery

In hydroponics, nutrients are delivered to plant roots via a water-based nutrient solution. Most home hydroponics systems use a nutrient solution created by dissolving a commercial fertilizer blend in water. However, organic hydroponics systems use sources such as manure, bone meal, wood ash, and kelp.

In hydroponics, water and a solution of nutrients do all of the work to make the plant grow...there is no soil! The picture to the right is an example of one of the most basic types of hydroponics systems, a passive irrigation setup. In this setup, the plants are held in place by a growing medium (in this case perlite is being used).

Hydroponics Beginners Gardening Guide: How to Start a ...

Hydroponic growing is a horticultural method for growing crops, including cannabis, without the use of soil. In place of soil, growers use a mineral nutrient solution in a water-based solvent. Occasionally, growers may also use clay pebbles and sand.

Hydroponic Growing: A Beginner's Guide To Growing Weed At ...

Hydroponics is a Greek term, made from two words - Hydro means water and Ponos means labor. And hence "working water" is its raw meaning. To put simply, Hydroponics is the method of growing plants without soils. Plants are grown in a soilless medium (we'll know about it below) and come into contact with the nutrients in the water for their growth.

Hydroponics Gardening For Beginners!
Hydroponics (hydro = water + ponics = labor) gardening is basically growing plants without the help of soil. The fact that hydroponics gardening allows you to grow your plants about 30 to 50 percent faster than if you planted them in the soil in a traditional garden is one of the reasons why many gardeners find this type of gardening worth working with.
