Smallpox - Symptoms and causes - Mayo Clinic

The 1837 Great Plains smallpox epidemic spanned 1836 through 1840, but reached its height after the spring of 1837 when an American Fur Company steamboat, the S.S. St. Peter, carried infected people and supplies into the Missouri Valley. More than 17,000 Indigenous people died along the Missouri River alone, with some bands becoming nearly extinct. ...

1837 Great Plains smallpox epidemic - Wikipedia

The disease also upset the balance of power between tribes on the Great Plains, said R.G. Robertson, the Arizona-based author of "Rotting Face: Smallpox and the American Indian." "It created a...

Smallpox fears stir memories of heavy toll Indians ...

R. G. Robertson's Rotting Face: Smallpox and the American Indian relates the 1837-1838 smallpox epidemic that devastated the Native American population. Topic certainly fills a void in the smallpox and Native American literature. Robertson reveals the interdependent relationship between the Native Indians and the settlers' fur trade.

Flat-type (malignant) Smallpox. Flat-type—or malignant—smallpox is very rare, and is characterized by intense toxemia. It occurs more frequently in children. In contrast to ordinary smallpox, the skin lesions in this type develop slowly, merge together, and remain flat and soft (often described as “velvety” to the touch).

The smallpox outbreak of 1837-1838 on the Northern Plains, forever changed the political and social structure of the tribes in that region. Before it ran out of human fuel, Rotting Face claimed an estimated 20,000 natives, doing more damage to the tribes in one year than all the military expeditions sent against the American Indian before or after.

Rotting Face : Roland G. Robertson : 9780870044199

Rotting Face: Smallpox and the American Indian and Guns, Germs, and Steel and other books explore the devastating effect of smallpox on the American Indian. Although there has been some documentation of smallpox being used as a biological weapon against Indians, most of the sources I have seen indicated that European colonists greatly feared smallpox among the Indians.

Chicago vs. Smallpox | Chicago Public Library

Smallpox is usually spread through direct and fairly prolonged contact with an infected person, particularly with face-to-face contact. It is typically spread among people who share living quarters. This is probably because patients with smallpox are severely ill in the period when they are most infectious, and so they are unlikely to have ...

Smallpox Guide: Causes, Symptoms and Treatment Options

The "post surgeon," whose name was Charles Larpenteur, was actually at Fort Union rather than Fort Clark—the near-simultaneous outbreaks of smallpox at the two are typically treated as a single phenomenon—and normally functioned as a clerk; Robertson, Rotting Face, pp. 230-1. (p.
