By Triangle Sum
Theorem, the sum of
the measures of the
interior angles of a
triangle is 180° . So,
we have $x^\circ + x^\circ + 40^\circ = 180^\circ$ Simplify. $2x + 40 = 180$. Subtract
40 from both sides. $2x$

File Type PDF
Triangle Sum
Theorem Practice

$= 140$. Divide both sides by 2. $x = 70$ So, the measure of each missing angle is 70° .

Sum Investigation, students work in groups of four to "discover" the interior angle sum of a triangle. The structure of this investigation requires each student to take on a different "case" to explore, compare results, and then draw conclusions. In this investigation, the group collectively explores the angles of acute, right, obtuse, and isosceles triangles
